

# **TL1000R**

## **INDIVIDUAL BALE WRAPPER**

# INDIVIDUAL BALE WRAPPER

Specifications	TL1000R
Bale Size	4' x 4' to 5' x 5' 6"
Film Width	30"
Length	104"
Width	80"
Height	84"
Weight	1,600 LBS
HP Required	30 HP
Three Point Hitch	Category II
Drive Type	Hydraulic
Bale Guides	Adjustable (4' or 5')

The wrap counter allows you to set the desired number of rotations of wrap per bale and displays the current rotation.

Adjustable bale guides allow 4' or 5' bales to be centered on the turntable ensuring even delivery of wrap.

Located on the turntable, the two rollers spin the bale while wrapping, ensuring it's completely sealed.

Easily unload wrapped bales by lifting the 3PH.

After a bale has been unloaded and a new one is placed on the turntable, the knife easily cuts the plastic wrap for continuous operation.

The manual transport lock secures the bale platform to prevent dumping during transport.
